

Partha Sarathi S

Hosur, Tamil Nadu, India | +91-8668019940 | parthasarathiatwork@gmail.com | LinkedIn | GitHub

EDUCATION

Vellore Institute of Technology (VIT), Vellore

B.Tech CSE (AI&ML) – Currently 4th Year

2023 – 2027

CGPA: 8.0/10.0

SKILLS

Programming: Python, C, C++, Java, JavaScript, R, SQL, MySQL **AI/ML:** Artificial Intelligence, Machine Learning, Generative AI, NLP, Speech Recognition, OpenCV

Web: HTML, CSS, React.js, REST API, Firebase **Cloud/DevOps:** AWS, GCP, Cloud Computing, Git, Linux

Blockchain: Solidity, Smart Contracts, Blockchain Development **Tools:** NumPy, Pandas, Matplotlib, Excel, Figma, Gemini, Antigravity

Professional: Research, Leadership, Management, Operations, Content Strategy, Marketing

EXPERIENCE

Renza

Research & Management Intern

Aug 2026 – Present

- Support Research and Development (R&D) through research, analysis, idea exploration, and evaluation of emerging technologies and solutions.
- Contribute to management activities including coordination, documentation, problem solving, and technology-driven initiatives.

Titan Company Limited

SAP Systems Intern

Jun 2026

Hosur

- Gained exposure to enterprise SAP workflows, HTML, CSS, Microsoft Excel, and industrial software practices, with practical understanding of SAP-based business processes.

Google Developers Group (GDG)

GDG Member

May 2026 – Present

Chennai

- Participated in technical sessions and developer events focused on GCP, Antigravity, cloud technologies, and modern AI tools.

Entrepreneurship Cell, VIT

Content & Operations Executive

May 2024 – Apr 2025

Vellore

- Created articles and event content while supporting event planning, operations, coordination, and execution.

RoboVITics, VIT

AI & ML Core Member

Apr 2024 – Apr 2025

Vellore

- Worked on AI/ML concepts and computer vision applications involving machine learning, image processing, and robotics.

PROJECTS & RESEARCH

Voice Identification System

Project Link

- Developed an AI-based voice identification system using Speech Recognition, AI/ML, JavaScript, HTML, and CSS for user recognition and verification.
- Built a web interface for voice processing and identity matching, demonstrating an end-to-end AI application.

Voice Cart AI – Voice Command Shopping Assistant

Project Link

- Built an AI-powered voice shopping assistant using Speech Recognition, NLP, React.js, JavaScript, REST APIs, and web technologies for voice-based product discovery.
- Enabled voice-driven shopping workflows through an interactive web application integrating AI, speech processing, and frontend technologies.

Battery Management System (BMS)

Make-a-thon – Hardware Hackathon

- Developed an IoT-enabled BMS prototype using STM32, ESP32, Arduino, CAN Bus, LiFePO4 battery, LCD, sensors, and voltage regulation for battery monitoring.
- Integrated embedded hardware and communication interfaces to monitor battery parameters and display real-time system information.

Supervised ML-based Intrusion Detection System

IEEE Conference Accepted – 2025

- Developed supervised ML models for IoT intrusion detection, improving detection while reducing false positives through feature optimization.

CERTIFICATIONS & EXTRACURRICULAR

AWS Certified AI Practitioner – Aug 2026 | **AWS Certified Cloud Practitioner** – May 2026

Oracle OCI AI Associate – Oct 2025 | Participated in **Smart India Hackathon**, contributing to collaborative problem solving and prototype development.
